

US-Lab, Inc. is a software licensing consultancy and reseller. We help companies choose the right licensing model for a project, size the seat count and term, and buy the software through one supplier on one invoice instead of a dozen separate vendor accounts. We have done this work since 1997.

CORE SERVICES

- **License model consulting** — per seat, per device, floating, subscription, and perpetual with support
- **License procurement** — sourced from publishers and authorized distributors, delivered electronically
- **Multi-vendor projects** — licenses from several publishers aligned on terms and renewal dates
- **Consolidation** — many vendors combined into a single invoice and a single payment

WHY US-LAB

- Independent reseller: we buy as principal, take no commission from publishers
- One supplier, one invoice, one payment across your whole software estate
- Purchase records kept and available to verify amounts invoiced
- Payment direct to a US bank account; sanctions and export-control aware

VENDOR CATEGORIES

Backup & Recovery

Security

Developer Tools

Network & Monitoring

Documents & Imaging

Data, Storage & Utilities

Relationships with 150+ vendors including Acronis, Bitdefender, JetBrains, SolarWinds, ABBYY, Flexera, DataCore, TechSmith, Redgate, Paessler and many more.
